Engineer Project petrochemicals and gases / Master degree

It is with interest that I want to hold a position in your respectful company. I beseech you because I believe in your esteemed company, I could exercise all my studies which I have learned to take advantage of all that I have learned in the field of industrial chemistry to contribute to the development of your business. I try to invest in a successful company where my skills would allow me to develop new projects hoping that my training and knowledge you be useful.

Thank you for the attention you will bring to the consideration of my application and remains your disposal for any further information or interview that you should offer me.

I would be pleased to meet with you and explain more in detail my skills and capabilities.

Waiting for an answer from you, please accept, Sir, the assurances of my regards.

my Signature
Ali.Tlili

Certificated in (Engineer) From July 2012 Till August 2013

Cotecna
Odessa - Ukraine

- laboratory of chemicals analyses
- analyses of chemicals and petroleum products
- Analyse of Agricultural commodities: grains, pulses, oilseeds, vegetable and animal oils & fats, feedstuffs, # bres,sugar, coffee, cocoa,fruits & vegetables, frozen products, etc. and fertilizers(dry bulk & liquid)»
- Metals and minerals (ferrous, non-ferrous, ore,coal, scrap, etc.)

Engineer petrochemicals, Industrial gases From February Till June 2012

LUKOIL
Odessa - Ukraine

(Station of petroleum refining ,atmospheric distillation and vacuum distillation of oil)

- Various technological processes of oil refining and receipt of various fractions
- Exploration and production of oil derivatives
- Classification of petroleum products and refining processes
- Control operating oil units
- Refining of the various units

practice at : From April Till June 2011

LUKOIL
Odessa - Ukraine

- **Station Reforming and Cracking catalytic of oil**
- Technical Assistance
- Environmental Control of petroleum activities
- Optimization of oil production and industrial facilities

Skills Background

worker training

From July Till September 2009

Air liquide
Nabeul - Tunisia

- Operating and production of liquefied gas products(O₂,N₂,C₂H₂,...)
- Liquefaction and marketing of natural and petroleum gas
- Gas Safety Training
- Recommendations on used gas and equipment
- Proposals for upgrading your installation
- Calibration of gas analyzers

Higher technician in engineering chemistry

From March Till June 2009

FST
Tunis - Tunisia

Laboratory of organic synthesis : final project`s study Higher technician in engineering chemistry

- Organic synthesis of benzene derivatives and industrials gases
- Analytical chemistry and spectroscopic analysis of organic substances.
- Extraction of essential oils and aromatic products
- Chromatographic and spectroscopic analyses (HPLC,CCM,IR)
- Water treatment
- Organic and pharmaceutical synthesis

Master degree petrochemicals and gases

November 2013

Polytechnic University
Ukraine

Specialized Master (technology of production of hydrocarbons and gasoline by producing synthesis gas, methanol and dimethyl ether from the gaseous waste of oil)

Development of a highly efficient and cost-effective technology for processing industrial by-product gases oil into diesel fuel and high-octane gasoline. Catalytic conversion of gases (CO₂ . CO, H₂,...) and gaseous waste of oil to the synthesis of Methanol , dimethyl ether to the production of gasoline Technology processing gaseous waste oil in the synthesis gas (CO + H₂) using waste last stages (CO₂), Obtaining methanol and diethyl ether to the synthesis gasoline from converting methane(CH₄).

Engineer

July 2012

Polytechnic University
Ukraine

Polytechnic University of sciences and technologies

Engineering Faculty of chemical technology \ engineer in the petroleum chemistry and organic substances

- technical project modernization and installation of station of rectification and atmospheric distillation of oil

Higher Technician in Engineering chemistry

June 2009

FST
Tunisia

Department of Chemistry and organic substances.

- Higher Technician in Engineering chemistry Diploma (DUT)

Bachelor

June 2006

(math, physic)
Tunisia

Softwares

AutoCAD , Coreldrow ,Compass 3D , Chemlab ,ABBT , PanOil / gaz

programming tools

Pascal

C++

office tools

MS-Project

Microsoft office (word,excel,microsoft acces,Power point,..)

Personal Interests

Microsoft windows (exploitation and reparation)

Arabic

Native language

English

Fluent

French

Fluent

Russian

Fluent

Responsible

communicative , diligent,creative , responsible, punctual, ambitious, listening skills and communication, attentive, quiet, independent, fast learning all new concepts

Interests

internet, software, petroleum & gas, sciences,energy ,diving,
traveling, football, reading , Athletics
